Assembly points at Brightlands Chemelot Campus

Always be aware of the exact location of the nearest emergency exit in the building you are in and also of the different assembly points on Campus. If another assembly point on Campus is announced via the PA system, these instructions will prevail and must be followed. For the specific assembly point of the building you are working in or visiting, contact the building's emergency response officer.

Our NEW assembly points have:

- Sufficient space.
- Availability of a public announcement system with good audibility.
- Room for placement of a large sign indicating the assembly point and the characteristics of the assembly point designation.
- A location at a reasonable distance from the Chemelot Industrial Park sources of risk.

Assembly point 'P5':

- *(Safe in the most common wind direction conditions (West - Southwest)).*
- Sufficient space, can accommodate a large number of campus residents.
- Good facilities for public announcement system available.
- Facility for performing roll call (*AEOS badge reader*).
- Alternative to 'P1' → In the event of an emergency, G111 (G111-160, G111-014-017-018-019) and in easterly wind conditions.
- Alternative to 'PPA' → In the event of a PPA emergency, far enough from the source.
- If the siren alarm sounds → Go to the RDR building of G122-170 and/or G122-200.

Assembly point 'PPA':

- *(Safe in the most common wind direction conditions (west - southwest)).*
- Sufficient space, can accommodate Pilot Plant Area occupancy.
- Good facilities for public address system available.
- If the siren alarm sounds → Go to the RDR building of G122-170 and/or G122-200.

Assembly point 'P1':

- *(Safe in the most common wind direction conditions (west - southwest)).*
- Sufficient space, can accommodate a large number of campus residents.
- Good facilities for public announcement system available.
- Good alternative if assembly point 'P5' is not accessible → In the event of an emergency in building areas G121, G122, Chemelot Industrial Park.
- In the event of a siren alarm during an evacuation → Drive away from the Campus, heading towards Hotel Van der Valk.
